ABOUT

I'm a seasoned professional with an extensive background in Finance and Healthcare, including 6 years in analytical roles and 2 years in data roles. I'm passionate about Data Science and I love telling data stories! My work defines data, enhances efficiency, clarifies communication, and increases insight.

QUALIFICATIONS

- Skill sets in Python, R, PostgreSQL, Tableau, and Machine Learning
- Understanding of ETL, data cleaning, and EDA
- Experience creating dashboards and data stories using multiple data visualization technologies
- Experience analyzing data and delivering insights using Python and R on multiple projects
- Published analyst & writer whose work was distributed to an audience of more than 2.5 million
- Background communicating technical, complex material to a non-technical, layperson audience
